

RUCHIR GANATRA

Data Analyst | Python Developer | SQL Expert

Ahmedabad, Gujarat, India | thakkerruchir044@gmail.com | github.com/Ganatra-Ruchir | linkedin.com/in/ruchir-ganatra
Portfolio: ruchirganatra-github-io.vercel.app | [Linktree: linktr.ee/ruchir.ganatra](https://linktree:linktr.ee/ruchir.ganatra)

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst and Python Developer with hands-on experience in SQL, data visualization, and machine learning. Skilled at transforming raw, unstructured datasets into clear, actionable business insights through Python, SQL, and modern analytics tooling. Proven ability to build interactive dashboards, automate data workflows, and apply statistical and machine learning methods to solve real-world problems. Quick learner with strong analytical thinking, comfortable working independently or within a collaborative team to deliver accurate, data-driven results.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, HTML, CSS

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Streamlit, Excel

Databases: MySQL, SQL Workbench, Relational Database Design

Machine Learning: scikit-learn, Data Preprocessing, Feature Engineering, Classification, Regression, Cross-Validation

Tools & Platforms: GitHub, Kaggle, VS Code, Google Colab, Jupyter Notebook, Git

PROFESSIONAL EXPERIENCE

Data Analyst — Projects & Freelance

2024 – Present

Self-Employed | Ahmedabad, Gujarat, India

- Built multiple end-to-end data visualization dashboards in Python (Matplotlib, Seaborn, Pandas) to uncover trends and patterns across real-world datasets, improving stakeholder decision-making.
- Wrote and optimized complex SQL queries — including multi-table joins, subqueries, window functions, and aggregate functions — to extract and analyze data from large relational databases.
- Competed in Kaggle classification and regression competitions, applying feature engineering and cross-validation techniques to improve model accuracy and generalization.
- Designed and deployed interactive Streamlit web applications enabling real-time data exploration, dataset upload, and dynamic report generation for non-technical end users.
- Followed reproducible analytics workflows using Git/GitHub for version control, ensuring clean, well-documented, and maintainable code across all projects.

PROJECTS

Data Visualization Dashboard | Python, Matplotlib, Seaborn, Pandas

Designed interactive dashboards to analyze business trends and patterns from multi-source datasets. Implemented bar plots, line graphs, heatmaps, and scatter plots to communicate insights clearly to non-technical stakeholders, reducing analysis turnaround time.

SQL Data Analysis Project | SQL, MySQL, Database Design

Solved complex, multi-table business problems using advanced SQL. Applied joins, window functions, CTEs, and aggregate functions to extract, transform, and analyze data, delivering query-ready datasets for reporting.

Kaggle Machine Learning Competition | Python, scikit-learn, Pandas

Built supervised learning pipelines for classification and regression tasks, including data cleaning, feature selection, and model evaluation via cross-validation, improving prediction accuracy through iterative tuning.

Streamlit Data Analytics Web App | Streamlit, Python, Pandas

Developed an interactive web app allowing users to upload datasets, perform exploratory data analysis, and generate dynamic visual reports in real time — bridging the gap between raw data and actionable insight for non-technical users.

EDUCATION

Diploma in Information Technology

2023 – 2026 (Expected)

Aditya Silver Oak Institute of Technology, Ahmedabad, Gujarat, India

Relevant Coursework: Data Structures, Database Management Systems, Statistics, Machine Learning, Data Mining, Web Development

CERTIFICATIONS

- Python Certification — Kaggle, 2025
- AI Tools & ChatGPT — be10X, 2025
- Elements of AI — University of Helsinki & MinnaLearn, 2025

ADDITIONAL INFORMATION

- Languages: English (Professional), Hindi (Native), Gujarati (Native)
- Available for full-time roles and internships in Data Analysis, Data Science, and Python Development
- Strong problem-solving skills with the ability to work effectively in collaborative, cross-functional team environments
